HOFFMAN'S HORSE PRODUCTS FEED GUIDE

www.hoffmanshorseproducts.com

A brown horse with a dark mane and tail is running across a grassy field. The horse is captured in motion, with its legs extended and its mane flowing. The background shows rolling green hills under a bright sky. The text is overlaid on the horse's body.

**HELPING HORSE PEOPLE
OPTIMIZE THEIR HORSE'S HEALTH.**

Hoffman's Horse Products is a line of fiber friendly feeds that have been designed with specific high quality ingredients using nutritional technology, which allow the horses system to utilize the full potential of the nutrients from not just the ration, but the forages that are being fed to the horse on farm. The Hoffman's line offers a feed for every horse designed to meet their specific needs to help them excel and reach their full potential.

Specialized nutritional additives have been used in this line of Hoffman's Horse Products. These include, but are not limited to, B vitamins, fat digestion aids, ZinPro® complexed minerals, organic selenium, Diamond V® yeast, and amino acids. With the nutritional technology that has been used in these products, along with being fed a high level of forage, all of the essential and sophisticated nutritional requirements of the horse will be taken care of in as small a supplemental package as possible.

Hoffman's Horse Products have been on the market since 1994 and by improving the health and performance of many horses along the way, Hoffman's has gained the respect and trust of horse owners across Canada. Hoffman's Horse Products is manufactured at Country Junction Feeds in Wetaskiwin, Alberta. Country Junction Feeds is a reputable company being established in 1917. This experience and their commitment to top quality can be seen in Hoffman's Horse Products.

*Balanced vitamin & mineral profile for each product at the recommended feeding rate (except Hoffman's ProFat & Hoffman's Crunchies)

*Feeding rates based off 1,000 to 1,400 lbs horse, contact Hoffman's Horse Products representative for feeding rates for horses outside that range

**What
is it?**

Foal feed and suitable for broodmares

Maintenance and light work

High performance pelleted feed

Senior horses

**When
should I use it?**

Feed from 6 to 24 months

When you are pasturing, wintering or not using the horse a lot

When you want a high performance feed

Feed to horses older than 18 years

**Why
should I use it?**

Low NSC feed. Allows for good growth and skeletal development. Low starch allows horse to start training with a better mind

It is a low NSC/starch feed with a low feeding rate. Great base ration to maintain body condition

Performance feed that has low NSC/starch. Balanced for peak performance

Very digestible feed with a moderate fat level. Keeps condition on older poorer doing horses

**How
do I use it?**

3-5 lb young foal.
4-6 lb for mares
4-7 lb as a two year old

4-6 lb
feeding rate

4 - 6 lb
feeding rate

4 - 8 lb
feeding rate

HOFFMAN'S CRUNCHIE

H100800
Cube / 15kg
approx. 3 1/2 cups = 1 lb

ORGANIC HORSE RATION

OH10000
Pellet / 20kg
approx. 3 cups = 1 lb

Forage extender

Textured feed

Insulin resistant

Supplemental

Treat

Organic complete feed

When you are short of pasture or good quality forage

When you want a textured feed with molasses added. Will do a good job if you are adding supplements to the horse feed

Feed to horses with insulin resistance

Feed to horses needing more body condition and/or energy

Can be used as a treat or supplemental protein

When needing a high quality organic horse ration

Extend expensive hay or poor quality pastures

A lower NSC textured feed (<30% NSC vs >40% for normal textured feed)

Keep your IR horse performing longer

Concentrated cool energy source Balanced Omega Fatty acids

Tasty low NSC treat

Uses high quality organic ingredients to help maintain body condition

4 – 12 lb feeding rate

4-8 lb feeding rate

8 – 12 lb feeding rate. Low hay feeding rate

1 – 4 lb feeding rate

Feed as a treat

4 1/2 - 9 lb feeding rate

Pellet / 6 kg

FOAL MILK REPLACER

070B5
Powder / 5kg

HOFFMAN'S BIAAMUGEN

H100850
Pellet / 5.5 kg

All-purpose mineral

For the equine athlete

Milk Pellets for foals

Foal milk replacer

Amino acid supplement

Use for all horses as an all purpose mineral

To provide your horse with a competitive edge for peak performance

Supplemental nutrition for foals

To supplement or replace mare's milk

To build a strong and healthy muscle mass

Amino Acid balanced
Contains ZinPro® &
Diamond V® Yeast

Contains essential amino acids
Electrolyte balance
Organic Trace Minerals

Palatable pellet to help supplement mare's milk to transition to dry feed

Will provide the balanced nutrition necessary for proper development of foals

Targeted amino acid nutrition that sole purpose is to build muscle

150-200 grams

150-200 grams

113 – 450 grams

See Page 21 for detailed feeding directions

- 150 grams
- 3 days on, 1 day off

SPECIALIZED NUTRITIONAL ADDITIVES USED IN HOFFMAN'S HORSE PRODUCTS

B VITAMINS

All feeds will have all B-vitamins added. Even though the feeds are developed to maximize microbial synthesis of these vitamins, we add in significant levels of such critical B-vitamins, such as biotin for hoof building.

FAT DIGESTION AIDS

All feeds with higher levels of fat (greater than 4% total) will have fat digestion aids built into the feed to enhance fat absorption and digestion. These will include phosphatidyl-choline and choline.

ZINPRO® COMPLEXED MINERALS

These trace minerals (cobalt, copper, manganese and zinc) are added into the Hoffman's Horse rations because they are more biologically available to the horse. High levels of minerals that interfere with absorption of regular trace minerals do not affect the ZinPro® complexed minerals. An example would be high levels of iron found in many hay samples.

ORGANIC SELENIUM

A portion of the selenium in all Hoffman's Horse rations contain organic selenium from Diamond V®. This is to ensure better absorption of selenium and much better utilization within the body.

DIAMOND V® YEAST

Diamond V® Yeast is added to all Hoffman's Horse rations. It is added to enhance the growth of the bacteria in the hind gut. The enhanced growth of these bacteria will enable better digestion of forages and fibers in general. This will result in better energy available to the horse. In general, this will allow us to feed a lower amount of ration and still be able to consistently provide a balanced energy to the horse.

AMINO ACIDS

Amino Acids are added to most of the Hoffman's Horse rations to keep the crude protein levels low while providing the essential building blocks of the protein to be adequate for the performance desired.

MAGNESIUM CHELATE

The use of this magnesium chelate in Hoffman's Horse rations allows for greater absorption.

When feeding a Hoffman's Horse Product, if your horse is receiving a high level of forage, all of the essential and sophisticated nutritional requirements of your horse have been taken care of in as small a supplemental package as is possible.

A white horse with dark legs is running in a field of tall grass. The horse is captured in motion, with its mane and tail slightly blurred. The background shows a fence and a clear sky.

NUTRITIONISTS**

HOFFMAN'S ELITE RATION

Feed form: Pellet

Product number: H100200

FEEDING DIRECTIONS

Hoffman's Elite Horse Ration is a part of the Hoffman's line of equine feeds. This feed is intended to be fed with dust-free good quality hay. Hoffman's Elite Horse Ration is designed to be fed at 1.6 – 2.4 kg per head daily, in at least 2 equal, separated feedings. Hay should be fed at 1.25 – 2 kg per 100 kg of body weight. Feed Hoffman's Elite Horse Ration at 2.5 kg per horse daily, in at least 2 equal separate feedings to horses at moderate to heavy work or for horses needing more body condition. The actual feeding level will be determined by the quality of the forage, level and intensity of the work, and the condition of the horse. This feed is intended for horses over 1 year of age. Always allow free choice access to clean water, salt and Hoffman's Horse Mineral.

GUARANTEED ANALYSIS

This feed contains added selenium at 1.1 mg/kg

Crude Protein (Min.)	14.0%	Sodium (Actual)	0.35%
Crude Fat (Min.)	8.0%	Salt (Actual)	0.45%
Crude Fiber (Max.)	19.0%	Vitamin A (Min.)	24,000 IU/kg
Calcium (Actual)	1.6%	Vitamin D3 (Min.)	3,000 IU/kg
Phosphorus (Actual)	0.9%	Vitamin E (Min.)	300 IU/kg

FEATURES AND BENEFITS

- **High Performance Feed**
Formulated for your equine athlete
- **Cool Energy**
Fat-based energy sources allow for a longer and cooler energy
- **Amino Acid Balanced**
- **Electrolyte Balanced**
Ensure increased and consistent performance
- **Low NSC**
Low starches and sugars allows your horse to compete with a more collected mind

HOFFMAN'S 16% PROFAT HORSE RATION

Feed form: Pellet

Product number: H100700

FEEDING DIRECTIONS

Hoffman's 16% Fat Plus Horse Ration is a part of the Hoffman's line of equine feeds. This feed is intended to be fed at 0.4 – 1.5 kg per head daily, in at least 2 equal, separated feedings. Good quality hay should be fed at 1.5 – 2.5 kg per 100 kg of body weight. This ration is intended for horses needing more body condition. This ration is also well suited for senior horses that need extra energy to maintain weight. The actual feeding level will be determined by the quality of the forage, level and intensity of the work, and the condition of the horse. This feed is intended for horses over 1 year of age. Always allow free choice access to clean water, salt and Hoffman's Horse Mineral.

FEATURES AND BENEFITS

- **An 18% fat level supplemental ration for horses needing more body condition**
- **Low NSC and starches**
Low starches allow for the horse to have a more collected mind in training and performance
- **Fat-based energy sources**
Allows for a longer lasting and cooler energy
- **Pelleted**
- **Consistent intake and nutrient levels formulated using quality ingredients**
- **Contains fat digestion aids**
Enables your horse to readily and easily digest and utilize fat

GUARANTEED ANALYSIS

This feed contains added selenium at 0.6 mg/kg

Crude Protein (Min.)	16.0%	Sodium (Actual)	0.35%
Crude Fat (Min.)	18.0%	Salt (Actual)	0.45%
Crude Fiber (Max.)	12.0%	Vitamin A (Min.)	15,000 IU/kg
Calcium (Actual)	1.5%	Vitamin D3 (Min.)	3,000 IU/kg
Phosphorus (Actual)	0.9%	Vitamin E (Min.)	400 IU/kg

HOFFMAN'S MAINTENANCE HORSE RATION

Feed form: Pellet

Product number: H100100

FEEDING DIRECTIONS

Hoffman's Maintenance Horse Ration is a part of the Hoffman's line of equine feeds. This feed is intended to be fed with dust-free good quality hay. Hoffman's Maintenance Horse Ration is designed to be fed at 1.5 – 2.5 kg per head daily, in at least 2 equal, separated feedings. Hay should be fed at 1.25 – 2 kg per 100 kg of body weight. Feed Hoffman's Maintenance Horse Ration at 1.5 kg per horse daily, in at least 2 equal separate feedings to horses to maintain adequate body condition. The actual feeding level will be determined by the quality of the forage, level and intensity of the work, and the condition of the horse. This feed is intended for horses over 1 year of age. Always allow free choice access to clean water, salt and Hoffman's Horse Mineral.

GUARANTEED ANALYSIS

This feed contains added selenium at 1.1 mg/kg

Crude Protein (Min.)	12.5%	Sodium (Actual)	0.35%
Crude Fat (Min.)	3.0%	Salt (Actual)	0.45%
Crude Fiber (Max.)	19.0%	Vitamin A (Min.)	20,000 IU/kg
Calcium (Actual)	1.45%	Vitamin D3 (Min.)	2,000 IU/kg
Phosphorus (Actual)	0.7%	Vitamin E (Min.)	200 IU/kg

FEATURES AND BENEFITS

- **A ration for maintenance and horses on light work**
- **Low feeding rate**
- **Low NSC and starch levels**
Allows your horse to have a cooler energy with a more collected mind
- **Complete with all the vitamins and minerals needed for optimal health**
Allows for good growth and skeletal development
- **Pelleted**
Consistent intake and nutrient levels formulated using quality ingredients

HOFFMAN'S HORSE CRUNCHIES

Feed form: Cube

Product number: H100800

FEEDING DIRECTIONS

Hoffman's Horse Crunchies Ration is intended to be fed with dust-free good quality hay. Hoffman's Horse Crunchies Ration is designed to be fed at 0.5 – 1.5 kg per head daily, in at least 2 equal, separate feedings when good hay is limited or hay is poor quality. Hay should be fed at 1.25 – 2.0 kg per 100 kg of body weight. Feed Hoffman's Horse Crunchies Ration at 0.5-1.5 kg per horse daily, in at least 2 equal separate feedings to horses that weigh 450 kg. The actual feeding level will be determined by the quality of the forage, level and intensity of the work, and the condition of the horse. This feed is intended for horses over 1 year of age. Always allow free choice access to clean water, salt and Hoffman's Horse Mineral.

FEATURES AND BENEFITS

- **Feed as a treat**
Useful for when training
- **Low NSC**
Low sugars and starches
- **Very palatable**

GUARANTEED ANALYSIS

This feed contains added selenium at 0.6 mg/kg

Crude Protein (Min.)	16.0%	Sodium (Actual)	0.35%
Crude Fat (Min.)	4.5%	Salt (Actual)	0.45%
Crude Fiber (Max.)	18.0%	Vitamin A (Min.)	17,500 IU/kg
Calcium (Actual)	1.0%	Vitamin D3 (Min.)	2,750 IU/kg
Phosphorus (Actual)	0.7%	Vitamin E (Min.)	150 IU/kg

HOFFMAN'S SENIOR HORSE RATION

Feed form: Pellet

Product number: H100300

GUARANTEED ANALYSIS

This feed contains added selenium at 0.6 mg/kg

Crude Protein (Min.)	12.0%	Sodium (Actual)	0.35%
Crude Fat (Min.)	5.0%	Salt (Actual)	0.45%
Crude Fiber (Max.)	24.0%	Vitamin A (Min.)	14,000 IU/kg
Calcium (Actual)	1.4%	Vitamin D3 (Min.)	3,000 IU/kg
Phosphorus (Actual)	0.7%	Vitamin E (Min.)	150 IU/kg

FEEDING DIRECTIONS

Hoffman's Senior Horse Ration is a part of the Hoffman's line of equine feeds. Hoffman's Senior Horse Ration is intended to be fed with dust-free good quality hay. Hoffman's Senior Horse Ration is designed to be fed at 2.5 – 5.5 kg per head daily, in at least 2 equal, separate feedings. Hay should be fed at 1.0 – 1.5 kg per 100 kg of body weight. Feed Hoffman's Senior Horse Ration at 4.5 kg per horse daily, in at least 2 equal separate feedings to horses that weigh 450 kg. This ration is well suited for senior horses that need extra energy to maintain weight. The actual feeding level will be determined by the quality of the forage, level and intensity of the work, and the condition of the horse. This feed is intended for horses over 1 year of age. Always allow free choice access to clean water, salt and Hoffman's Horse Mineral.

FEATURES AND BENEFITS

- **Feed to horses older than 18 years**
For senior horses needing extra energy to maintain weight
- **Very digestible feed with a moderate fat level**
Easy on your senior horse's system
- **A feed with low sugars and starches**
- **Added amino acids for senior athletes**
- **Complete with all the vitamins and minerals your horse needs for optimal mental and physical health**

HOFFMAN'S DEVELOPER RATION

Feed form: Pellet

Product number: H100000

FEEDING DIRECTIONS

Hoffman's Equine Developer Ration is a part of the Hoffman's line of equine feeds. This feed is intended to be fed at 1.0 – 3.0 kg per head daily, in at least 2 equal, separated feedings. Good quality hay should be fed at 1.0 – 2.5 kg per 100 kg of body weight. This ration is intended for weanling foals up to two years of age. For foals around weaning time, feed approximately 1.5 to 2.5 kg per day. Once weaned, feed to keep growth and condition adequate. The actual feeding level will be determined by the quality of the forage, level and intensity of the work, and the condition of the horse. Always allow free choice access to clean water, salt and Hoffman's Horse Mineral.

FEATURES AND BENEFITS

- **Formulated for weanling foals up to horses two years of age and suitable for broodmares**
- **Low NSC and starches**
Low starch allows your horse to start training with a more collected mind
- **Fat based energy sources**
Energy lasts for longer periods of time
- **Complete with all the vitamins and minerals needed for optimal health**
Allows for good growth and skeletal development
- **Pelleted**
- **Balanced Amino Acids**
Has the amino acids needed by young horses for optimal muscular and skeletal growth

GUARANTEED ANALYSIS

This feed contains added selenium at 0.3 mg/kg

Crude Protein (Min.)	17.0%	Sodium (Actual)	0.35%
Crude Fat (Min.)	5.5%	Salt (Actual)	0.45%
Crude Fiber (Max.)	22.0%	Vitamin A (Min.)	18,000 IU/kg
Calcium (Actual)	1.1%	Vitamin D3 (Min.)	2,500 IU/kg
Phosphorus (Actual)	0.7%	Vitamin E (Min.)	200 IU/kg

HOFFMAN'S BALANCI.R. RATION

Feed form: Pellet

Product number: H100600

FEEDING DIRECTIONS

Hoffman's BALANCI.R. Horse Ration is a part of the Hoffman's line of equine feeds. Hoffman's BALANCI.R. Horse Ration is designed to be fed with a low NSC (Non-structural Carbohydrate) forage to horses sensitive to higher levels of sugars and starches. Hoffman's BALANCI.R. Horse Ration is designed to be fed at 3 – 6 kg per head daily, in at least 2 equal, separated feedings. Hay should be fed at 1 – 1.5 kg per 100 kg of body weight. For horses needing more body condition, feed Hoffman's BALANCI.R. horse ration up to 8 kg per head per day in three or four equal feedings spaced at least 4 hours apart. The actual feeding level will be determined by the quality of the forage, level and intensity of the work, and the condition of the horse. This feed is intended for horses over 1 year of age. Always allow free choice access to clean water, salt and Hoffman's Horse Mineral.

GUARANTEED ANALYSIS

This feed contains added selenium at 0.6 mg/kg

Crude Protein (Min.)	10.0%	Sodium (Actual)	0.35%
Crude Fat (Min.)	3.0%	Salt (Actual)	0.5%
Crude Fiber (Max.)	30.0%	Vitamin A (Min.)	14,000 IU/kg
Calcium (Actual)	1.0%	Vitamin D3 (Min.)	1,400 IU/kg
Phosphorus (Actual)	0.55%	Vitamin E (Min.)	95 IU/kg

FEATURES AND BENEFITS

- **Formulated for horses with Insulin Resistance and suitable for horses with various other metabolic issues**
Keep your IR horse performing longer
- **Consistently formulated at an 11% NSC level and a starch content at less than 2%**
- **Pelleted**
- **Balanced vitamins and minerals needed**
Includes all the vitamins and minerals needed for optimal mental and physical health

HOFFMAN'S HAYSAVER

Feed form: Cube

Product number: H100400

FEEDING DIRECTIONS

Hoffman's HaySaver Horse Ration is a part of the Hoffman's line of equine feeds. Hoffman's HaySaver Horse Ration is intended to be fed with dust-free good quality hay. Hoffman's HaySaver Horse Ration is designed to be fed at 2.5 – 7 kg per head daily, in at least 2 equal, separate feedings when good hay is limited or hay is poor quality. Hay should be fed at 0.5 – 1.5 kg per 100 kg of body weight. Feed Hoffman's HaySaver Horse Ration at 4-7 kg per horse daily, in at least 2 equal separate feedings to horses that weigh 450 kg. The actual feeding level will be determined by the quality of the forage, level and intensity of the work, and the condition of the horse. This feed is intended for horses over 1 year of age. Always allow free choice access to clean water, salt and Hoffman's Horse Mineral.

FEATURES AND BENEFITS

- Extend expensive hay or poor quality pastures
- Contains Diamond V[®] Yeast for increased digestibility
- Low NSC content but high digestible fiber for energy
- No waste
- Easy to use
- Contains no dust or mold
- Comes in a cube form

GUARANTEED ANALYSIS

This feed contains added selenium at 0.6 mg/kg

Crude Protein (Min.)	12.0%	Sodium (Actual)	0.35%
Crude Fat (Min.)	3.0%	Salt (Actual)	0.45%
Crude Fiber (Max.)	24.0%	Vitamin A (Min.)	12,500 IU/kg
Calcium (Actual)	1.0%	Vitamin D3 (Min.)	1,250 IU/kg
Phosphorus (Actual)	0.6%	Vitamin E (Min.)	50 IU/kg

HOFFMAN'S TEXTURED RATION

Feed form: Textured

Product number: H10050

FEEDING DIRECTIONS

Hoffman's Textured Horse Ration is a part of the Hoffman's line of equine feeds. This feed is intended to be fed with dust-free good quality hay. Hoffman's Textured Horse Ration is designed to be fed at 2.5 – 4.5 kg per head daily, in at least 2 equal, separated feedings. Hay should be fed at 1.25 – 2 kg per 100 kg of body weight. Feed Hoffman's Textured Horse Ration at 3.5 kg per horse daily, in at least 2 equal separate feedings to horses to maintain adequate body condition under average work conditions. The actual feeding level will be determined by the quality of the forage, level and intensity of the work, and the condition of the horse. This feed is intended for horses over 1 year of age. Always allow free choice access to clean water, salt and Hoffman's Horse Mineral.

GUARANTEED ANALYSIS

This feed contains added selenium at 1.1 mg/kg

Crude Protein (Min.)	14.0%	Sodium (Actual)	0.35%
Crude Fat (Min.)	4.0%	Salt (Actual)	0.45%
Crude Fiber (Max.)	14.0%	Vitamin A (Min.)	15,000 IU/kg
Calcium (Actual)	1.0%	Vitamin D3 (Min.)	1,500 IU/kg
Phosphorus (Actual)	0.55%	Vitamin E (Min.)	125 IU/kg

FEATURES AND BENEFITS

- **Added molasses**
For ease of incorporating supplements to feed
- **Low NSC textured feed**
<30% NSC vs. >40% for other textured feeds
- **Added minerals, vitamins & amino acids**

HOFFMAN'S ORGANIC HORSE RATION

Feed form: Pellet

Product number: OH10000

FEEDING DIRECTIONS

Feed 14% Hoffman's Organic horse ration at a rate of 2 to 4.5 kg per head per day to a horse weighing about 500 kg. The actual amount fed will depend upon the quality of the organic hay fed and the level of activity of the horse. Organic hay will need to be fed at about 7 to 10 kg per head per day. Allow free choice access to fresh, clean water and an appropriate mineral

FEATURES AND BENEFITS

- **Certified Organic by Pro-Cert**
- **A complete feed using high quality ingredients**
- **Complete vitamin mineral package**
Contains the needed building blocks for optimal health
- **Organic Zin-Pro® Chelated minerals added**
Allow the minerals to be more biologically available to your horse
- **Organic Diamond V® Yeast**
Helps support the hindgut by enhancing bacteria growth which enables better digestion of nutrition by your horse
- **Low Feeding rates**
Starting at 4 ½ lbs
- **Pelleted**
Consistent intake and nutrient levels formulated using quality ingredients

GUARANTEED ANALYSIS

This feed contains added selenium at 0.43 mg/kg

Crude Protein (Min.)	14.0%	Sodium (Actual)	0.35%
Crude Fat (Min.)	4.0%	Vitamin A (Min.)	14,000 IU/kg

Cobalt (Actual)	30 mg/kg	Vitamin B12 (Min.)	500 mcg/kg

HOFFMAN'S HORSE MINERAL

Feed form: Mash

Product number: 317930

FEEDING DIRECTIONS

Free Choice: Place Hoffman's Horse Mineral in an open mineral feeder, protected from the elements. Place one feeder for every 10-15 head. Initially, remove all sources of salt. Place enough mineral for 2 to 3 days consumption in the feeder(s). Monitor intake. If mineral intake exceeds 200 grams per head per day, add salt blocks to the mineral feeder: approximately one block for every 10-15 head. Expected free choice consumption will be approximately 150-200 grams per head per day. This will vary depending on the condition of the horses, plane of nutrition, age, weight, weather conditions and sex of the horse.

Top Dressing: Hoffman's Horse Mineral may also be top-dressed on the horse's daily grain allowance. Top dress 150-200 grams for mature horses. For best results, top dress in two equal daily feedings. At all times allow horses access to clean water and adequate good quality, dust-free forage.

FEATURES AND BENEFITS

- **An enhanced all-purpose mineral**
- **Amino acid balanced**
- **Contain digestion aids**
Reduced ulcers
- **Supports immune system health**
- **Contains all the building blocks needed for sound hooves**
- **Suitable for a very large variety of horses**
- **Marked improvements seen in broodmares, stallions, foals, senior horses, and many more.**

HOFFMAN'S PERFORMANCE MINERAL

Feed form: Pellet

Product number: H791000

FEEDING DIRECTIONS

Free choice: Supply Hoffman's Performance Mineral for Horses in an open feeder, protected from the elements. Place enough mineral for 2 to 3 days consumption in the feeder(s). Monitor intake. Provide one feeder per every 10-15 head. Initially, remove salt, gradually adding salt blocks until mineral consumption stabilizes at the expected 150-200 grams per head per day.

Top Dressing: Provide 150-200 grams per head per day top dressed on the horses' daily grain allowance. For best results, feed in two equal daily feedings.

FEATURES AND BENEFITS

- Pelleted mineral for performance horses that most readily eat
- Contains Organic Trace Minerals
- Essential Amino Acids
 - lysine, methionine and threonine
- Electrolyte balance to ensure increased and consistent performance
- Contains building blocks for strong, resilient hooves

GUARANTEED ANALYSIS

HOFFMAN'S FOAL MILK REPLACER

Feed form: Powder

Product number: 070B5

GUARANTEED ANALYSIS

This feed contains added selenium at 0.3 mg/kg

Crude Protein (Min.)	20.0%	Calcium (Actual)	0.9%
Crude Protein from milk source (Min.)	20.0%	Vitamin A (Min.)	35,000 IU/kg
Crude Fat (Min.)	15.0%	Vitamin D (Min.)	5,000 IU/kg
Phosphorus (Actual)	0.8%	Vitamin E (min.)	300 IU/kg
Sodium (Actual)	0.8%		

FEATURES AND BENEFITS

- **Formulated to replace, or supplement mare's milk**
Will provide the balanced nutrition and energy necessary for proper development for orphaned foals or mares with poor milk production
- **All-milk protein formula**
Richest source of protein available for foals which promotes steady growth, proper muscle and bone development and a glossy coat
- **Designed to meet a foal's need for milk protein, lactose, fat, vitamins, and minerals**
Will help your foal grow and develop, on schedule, into a healthy horse
- **Highly palatable and easily digested**

FEEDING DIRECTIONS

Colostrum is important to the health of the foal. The foal should have colostrum within the first 3 hours after birth, continuing for another 3 days. Use the following schedule for a 45-50 kg (100-110 lb) foal. Smaller foals should be fed reduced amounts. Mix Hoffman's Foal milk replacer with warm water, 38°C (100°F), and feed according to the following schedule.

Days on Milk Replacer	Number of Feedings per Day	Warm Water per Feeding	Hoffman's Foal Milk Replacer per Feeding	Dry Foal Milk Replacer Per Day
1-3	4	450 ml	115 g	
4-5	4	680 ml	170 g	
6-7	4	910 ml	230 g	
2nd week	3	1210 ml	300 g	
3rd week	2	1815 ml	455 g	112 g
4th week	2	1360 ml	340 g	230 g

HOFFMAN'S FOAL MILK-BITS

Feed form: Pellet

Product number: 170B10

FEEDING DIRECTIONS

Foals can begin nibbling on Hoffman's Foal Milk-Bits as early as 10 days of age, while they are still nursing. Starting with 113 g (3/4 cup) of Foal Milk-Bits in addition to regular feeds, gradually increasing until the foal is consuming 450 g (3 cups) per day. Continue until the foal is weaned at five to six months of age. Fresh water should be provided at all times. These feeding levels are to be used as guidelines only. It is necessary that the suggested feeding levels be adjusted to meet individual animal requirements.

FEATURES AND BENEFITS

- **Promotes uninterrupted growth and proper bone and muscle development**
Can supplement mare's milk and help the foal to maintain optimum development and growth
- **Provides extra nutrition during periods of illness or less than normal consumption**
- **Can substitute for mare's milk during the weaning process**
Will help with the transition to dry feed consumption without setbacks
- **Can be fed to broodmares to help compensate for increased nutritional requirements**
- **Vitamin and mineral balanced**

GUARANTEED ANALYSIS

This feed contains added selenium at 0.3 mg/kg

Crude Protein (Min.)	30.0%	Calcium (Actual)	1.5%

HOFFMAN'S BIAAMUGEN

Feed form: Mash

Product number: H100850

GUARANTEED ANALYSIS

Crude Protein (Min.)	56.0%	Sodium (Actual)	0.35%
Crude Fat (Min.)	2.0%	Salt (Actual)	0.1%
Crude Fiber (Max.)	2.5%		
Calcium (Actual)	0.35%		
Phosphorus (Actual)	0.35%		

FEATURES AND BENEFITS

- **Targeted Amino Acid Nutrition**

With BiAaMuGen we supply nutrients to support muscle tissue growth while at the same time supplying nutrients to inhibit the break down of muscle tissue

- **For best results feed BiAaMuGen 3 days ON and 1 day OFF**

The reasoning being that the body becomes more efficient if it perceives that there is a shortage of the nutrient(s)

- **BiAaMuGen is to be used to build a strong and healthy muscle mass on your horse**

- **Uses high quality, balanced, amino acids**

- **Can be used for a variety of horses needing additional muscle mass during training**

Young horses beginning training, performance horses getting back in shape, and during times of heavy competition

- **Can be easily added to your horse's current ration**

FEEDING DIRECTIONS

Hoffman's BiAaMuGen Horse Protein Top Dress is a part of the Hoffman's line of equine feeds. This feed is intended to be fed at 150 grams (0.15kg) per head daily with a well-balanced ration adequate in energy, minerals and vitamins. This protein supplement should be well mixed with the ration fed to horses in training. Good quality hay should be fed at 1.25-2.0 kg per 100 kg of body weight. For best results feed the mixture to supply 150 grams of Hoffman's BiAaMuGen Horse Protein Top Dress daily. Feed the Hoffman's BiAaMuGen Horse Protein Top Dress during the training period and when requiring extra muscling. Forage level, intensity of the work, and the condition of the horse will determine the length of feeding, but in general, feed for 40 to 60 days. Once proper muscling has been achieved, feed Hoffman's BiAaMuGen Horse Protein Top Dress to 75 grams (0075 kg) daily during the remained training period. Always allow free choice access to clean water, salt, and Hoffman's Horse mineral. Consult your Country Junction Feeds advisor or nutritionist for more detailed feeding directions.
